Address: 10/189-1 South Street, Soosaipandiapuram, Thoothukudi, Tamil nadu

Profile Summary

Full Stack Developer with hands-on production experience across Java, Spring Boot, Angular, and MySQL/PostgreSQL, and practical DevOps exposure (Docker, Docker Compose, Nginx, VPS deployment). Built and shipped an AI-integrated web application using Gemini AI, alongside multiple deployed e-commerce and business platforms. Comfortable owning a feature end-to-end — from REST API design to containerized deployment on a production server.

Skills

Languages: Java, JavaScript, TypeScript, Dart

Frontend: Angular, Flutter, HTML/CSS, Responsive UI Design

Backend: Spring Boot, REST APIs, Authentication & Authorization (JWT), Microservice basics

Databases: MySQL, PostgreSQL, Firebase Realtime Database

DevOps & Deployment: Docker, Docker Compose, Nginx (reverse proxy + HTTPS), Linux VPS administration (Ubuntu), Vercel, Netlify, Render

AI Integration: Gemini AI API integration, prompt-driven response handling

Tools: Git, GitHub, Postman, VS Code

Professional Experience

Junior Developer : Trait-Distinguished. Feb 2026 – Present

- Developed and maintained a full-stack e-commerce platform using Angular, Java, Spring Boot, and MySQL.
- Designed responsive and user-friendly interfaces for product browsing, filtering, shopping cart, and checkout.
- Developed and integrated RESTful APIs for product management, authentication, orders, and user accounts.
- Implemented advanced product filtering, sorting, category management, and inventory (stock) management features.
- Deployed and managed the application on a Hostinger VPS Server running Ubuntu 22.04 LTS.
- Containerized frontend and backend applications using Docker and managed multi-container deployments with Docker Compose.
- Configured Nginx as a reverse proxy with HTTPS support and managed application deployment, updates, and monitoring.
- Used Git/GitHub for version control and collaborative development.

Full Stack Developer Intern : Postulate Info Tech Pvt. Ltd. **25/07/2024 – 26/08/2024**

Built responsive web interfaces using Angular. Integrated Spring Boot APIs with MySQL for backend operations.

Full Stack Developer Intern : Postulate Info Tech Pvt. Ltd. **17/03/2025 – 12/06/2025**

Designed and implemented authentication systems. Optimized backend logic using Spring Boot framework. Conducted unit testing and assisted in deployment.

Frontend Developer : Ethical Intelligent Technologies. **29/09/2025 – 05/12/2025**

- Developing cross-platform applications using Flutter
- Building responsive web applications with Angular

Projects

Kicha AI :

Kicha AI is a web-based AI assistant developed using Angular for the frontend and hosted on Vercel (kicha-ai.vercel.app) for fast and reliable deployment. The application uses Neon as a cloud-based PostgreSQL database to securely store and manage data. For intelligent responses, the system integrates Gemini AI, which processes user inputs and generates accurate, real-time answers. This architecture ensures high performance, scalability, and a smooth user experience.

BuyTrait – E-Commerce Platform : (buytrait.com)

Developed a full-stack e-commerce application using Angular, Spring Boot, and MySQL. Implemented secure user authentication, product management, shopping cart, wishlist, order management, product filtering, sorting, stock availability and an admin dashboard. Built RESTful APIs for seamless communication between frontend and backend. Deployed the complete application on a Hostinger VPS running Ubuntu, using Docker and Docker Compose for containerized deployment, with Nginx configured as a reverse proxy for production hosting.

Student Attendance Management System :

Developed a smart attendance system using Arduino (NodeMCU), RFID, and Firebase Realtime Database. Integrated RFID/NFC card reader with MFRC522 RFID reader to track student attendance. Implemented REST APIs for marking, viewing, and managing attendance records. Designed a responsive front end using Angular for admin and student notification via Firebase on successful attendance marking interfaces. Enabled real-time SMS

Kicha Netlify:

Developed a full-stack web application under the brand "Kicha Netlify." Designed a responsive frontend using Angular and hosted it on Netlify (kichatech.netlify.app). Built RESTful APIs using Spring Boot and connected them to a PostgreSQL database hosted on Render for backend operations. Core features include user authentication, order management, and an admin dashboard. Employed Git/GitHub for version control and team collaboration.

Jesintha Earth Movers :

Jesintha Earth Movers is a modern, responsive static business website developed using Angular and deployed on Vercel (jesintha-earth-movers.vercel.app). The project showcases earth-moving services with a clean UI, fast performance, and smooth navigation, providing customers with clear information about services, company details, and contact options. This website is designed to create a strong online presence for a local earth-moving business and to make it easy for clients to understand available services and get in touch quickly.

Education

St. Mother Theresa Engineering College : Bachelor of Engineering in Electronics and Communication Engineering **2021 – 2025**

St. Joseph Matriculation Higher Secondary School : HSC **2020 – 2021**

Languages

Tamil , English
